Oxbury///

Senior iOS Developer

Reporting Line:	Lead Mobile Software Engineer
Role Level:	4
Location:	Chester

About Us

We are Oxbury: The only UK bank dedicated to British agriculture. Founded by farmers, bankers, and technologists, we have combined the worlds of financial services, technology, and agriculture to provide bespoke financial products to support the rural economy.

Our mission is to create and grow a sustainable, customer-focused, and innovative bank that supports and champions the financial health of the rural economy.

About the Role

Play a key role in the development and maintenance of Oxbury's iOS mobile app

Role Responsibilities

- Play a key role in the architectural approach, code design and implementation for the Oxbury iOS App.
- Develop new features and UI within the Oxbury iOS App from agreed specifications.
- Implement high quality production ready code as required following iOS design patterns, principles and best practices.
- Maintain existing features, dependencies and ensure security standards are met as required.
- Write and maintain unit tests to automatically test intended code functionality and logic.
- Assist QA with automated UI tests where appropriate.
- Play a key role in planning and provide estimation within an Agile software development process.
- Follow platform relevant secure coding principles whilst contributing to security modelling and reviews.
- Liaise with relevant stakeholders to understand requirements, plan and deploy the app.
- Evaluate & select appropriate libraries, architectures and tools to perform role.
- Distribute / release the app to beta testers and our customers as required.
- Build out and maintain the mobile Continuous Integration System for iOS.
- Contribute to and follow agreed software development processes and procedures as required by the company.
